

A new home. A bigger vision!

From **7 August 2026**, DiversiTech will be operating from our new purpose-built distribution centre site which marks a major expansion, giving us the space, capability and flexibility to serve our customers better than ever. Faster. Smarter. Exactly how you want it.

We have established the operational foundations of our expanded site, increasing manufacturing capacity, improving efficiency and enhancing operational agility. This has created a seamless, end-to-end workflow from production through to customer delivery.

Our new facility provides the space, technology and flexibility needed to support continued growth, drive innovation and further enhance the service we deliver to our customers, both now and in the future.

We would like to thank our customers for their patience, support and continued business throughout this period. While much of the work has taken place behind the scenes, your understanding and loyalty have been greatly appreciated. We look forward to welcoming you to this exciting new chapter and delivering even greater value from our new home.

Bigger site. Broader capability. Better service.
